

OARS

CORPORATION

Experience you can trust, service you can count on.

*Overview of our
Products and Services*

About us: OARS Corporation is an international consultancy firm focused on helping its clients accelerate their international sales and business development objectives. In this era of globalization we clearly recognize the increasing needs of being connected to the right people, with the right businesses, in the right territories.

Therefore, our team of dedicated professionals act as the bridge that makes these connections. A bridge that provides the most direct and smooth route, along with reliable professional service. Moreover, we wish to not only bring our clients to their desired destinations quickly, but to also allow them to enjoy a jolly good ride along the way!

We couple your objectives with our global experience, taking your business objectives to the next level – *The global level.*

Our Products & Services

Industrial Sourcing: In this era of globalized manufacturing, organizations can effectively optimize development, resource use and supply chain efficiency.

Using our vast experience spanning automotive, aerospace and marine sectors we can connect you with reliable suppliers anywhere on the globe thus building long term relationships and a win-win case for all parties.

E-Learning Development: E-Learning training modules have proved to be a time efficient, cost effective and highly scalable option for organizations to train their workforce.

Our team of highly experienced Subject Matter Experts can identify your training needs and develop training solutions customized to meet your training objectives. We offer training solutions development in all areas, be it Health & Safety, Supply Chain, Finance or Marketing.

Health, Safety & Environmental Consultancy: Health, Safety and Environmental compliance is of paramount importance than anything else in organizations that value their most valuable asset, their people. In this age it is key to keep abreast with the ever changing HSE regulations, standards and best practices.

We provide expert advice, conduct third-party audits and develop management systems to help you in meeting all your compliance requirements.
